Python 3.10.7 latest version was installed

The image contains two side-by-side screenshots of a Windows environment. The left screenshot shows the IDLE Shell 3.10.7 window. The title bar reads 'IDLE Shell 3.10.7'. The menu bar includes 'File', 'Edit', 'Shell', 'Debug', 'Options', 'Window', and 'Help'. The shell displays the following text: 'Python 3.10.7 (tags/v3.10.7:6cc6b13, Sep 5 2022, 14:08:36) [MSC v.1933 64 bit (AMD64)] on win32', 'Type "help", "copyright", "credits" or "license()" for more information.', and a prompt '>>>'. The user has entered 'print("helloworld")' and the output 'helloworld' is displayed. The right screenshot shows a command prompt window titled 'Python 3.10 (64-bit)'. The text inside the window is identical to the IDLE shell, showing the version information and the execution of 'print("hello")' resulting in the output 'hello'.
